Total Productive Maintenance (TPM) WORKSHOP

3 FUNDAMENTAL PILLARS FOR SUCCESSFUL IMPLEMENTATION

“If you think Maintenance is expensive, you should try a Breakdown”

Workshop Overview

Today, with competition in industry at an all time high, Total Productive Maintenance (TPM) may be the only thing that stands between success and total failure for some companies. It has been proven to be a program that works. It can be adapted to work not only in industrial plants, but in construction, building maintenance, transportation, and in a variety of other situations. Employees must be educated and convinced that TPM is not just another "program of the month" and that management is totally committed to the program and the extended time frame necessary for full implementation. If everyone involved in a TPM program does his or her part, an unusually high rate of return compared to resources invested may be expected.

This TPM Fundamental Workshop focuses on getting the management, maintenance personnel and equipment users all working together to prevent equipment problems and reduce expenditures. By giving ownership and responsibility of equipment and processes to the right employees, equipment breakdowns are reduced. TPM 8 Pillars & 5S provides a systematic approach to setting standards and visual guides for preventing breakdowns and making your equipment run smoothly. By the end of this workshop, participants will be able to go back to their facility and immediately apply what they learned to help keep their equipment up and running.

Training like this never costs – it pays!

Training Outcomes

Upon completion of this Workshop, participants will receive insights on:

- Understanding How and Why Equipment Fails
- Identifying Causes and Types of Equipment Failures
- Using Root Cause Identification Tools
- Measuring and improving Overall Equipment Effectiveness (OEE)
- Implementing 5S
- Building an Effective Maintenance Team
- Creating a Tracking and Checklist Program
- Utilizing Visual Guides
- Learning How to Communicate TPM through the whole Facility

Who should attend this workshop?

This Workshop is a must for anyone who is involved with operations or maintenance at industrial plants, utilities or commercial and private building facilities. Attendees come from a wide variety of industries, skill-levels, company sizes, and job titles, so if you're not sure you'll fit in or will benefit from the class, don't worry – you will – as long as your job involves participating or running an effective enterprise!

Workshop methodology

- Workshop conducted over a 3 day period
- Case studies with best practice examples & Videos
- Supportive comprehensive TPM Workshop manual enabling practical application and reinforcement.

GAUTENG GROWTH AND DEVELOPMENT AGENCY

Your Course Expert

Dr. Uttam Kumar Chatterjee is regarded as a veteran in the field of TPM and has more than 3 decades of experience. He was associated with Unilever for 28 years where he headed the Regional Quality function of AAC (Asia Africa Middle east and Turkey, Central & Eastern Europe). He led through a Quality Executive Board of nine cluster heads covering all businesses of Unilever spread over more than 30 countries, 120+ factories. Mr. Chatterjee represented the region in all relevant Global leadership teams and retired on October, 2011.

Currently Dr. Chatterjee is CEO and Director of Advance TPM Solution. He is also a TPM Top Management Advisor, Local Consultant and representative to Japan Institute of Planned Maintenance Solutions. He is a 'Adjunct professor' in the Indian Institute of Technology, Kharagpur, 'Senior Advisor' to Food and Agri Centre of Excellence of Confederation of Indian Industries and Vice President of MESC China.

Dr. Chatterjee have been working with the AIDC on their TPM Cluster programme for the last 18 months and has been instrumental in the up skilling of the AIDC TPM project managers in the TPM methodology.
